Daniel Martynovich

Aspiring data analyst with SQL/PostgreSQL experience in data modeling, validation, and quality checks. B.S. Computer Science (Rutgers), MS/MBA Data Science in progress.

732-570-3783 | Mountain Top, PA | danmartynovich@gmail.com | Portfolio: https://person5555.github.io

EDUCATION

Rutgers University – New Brunswick | B.S. Computer Science, Minor in Mathematics | Aug 2025

- Relevant Coursework: Information and Data Management (SQL), Data Structures, Machine Learning, Intermediate Statistical Analysis, Software Methodology

Eastern University | MS/MBA Data Science (in progress) | Expected 2027

- Relevant Coursework: Database Management with SQL, Data Manipulation (Python, Pandas), Data Analytics in R, Statistical Modeling, Natural Language Processing

Certifications: Udemy SQL Bootcamp, Udemy Flutter & Dart Bootcamp

TECHNICAL SKILLS

- Databases & SQL: SQL (PostgreSQL), Data Modeling, Schema Design, Stored Functions, Views
- Data Analysis: Python (Pandas, NumPy), R (Tidyverse), Regression, Data Validation, Anomaly Detection
- Programming: Java, Dart, TypeScript, JavaScript, Crystal
- Tools & Platforms: Supabase, Git, Flutter, Deno, Firebase, Redis, VS Code

PROFESSIONAL & PROJECT EXPERIENCE

DataAnnotation | *Prompt-Based Coding Evaluator* | *Jul 2025 – Present*

- Completed 120+ hours of AI model evaluation, testing code and math responses for correctness across Python, Java, SQL, R, and Dart, plus calculus, statistics, and linear algebra.
- Wrote original prompts and grading rubrics to measure model accuracy, reasoning quality, and code correctness.

Idle Cosmos | *Collaborative Side Project* | *Oct 2024 – Jan 2025*

- Built game logic in Crystal for a multiplayer idle game with 30+ power-ups and achievements as part of a 3-person team.
- Used BigFloat arithmetic to keep exact precision for in-game values over 50 digits long, beyond what standard 64-bit floats represent accurately.
- Stored and synchronized real-time player state in Redis across concurrent sessions.

Nomo SC LLC | *Co-Founder and Co-Developer* | *Sep 2023 – Oct 2024*

Social networking app for discovering local events, coordinating availability, and connecting with friends and groups; published on the iOS App Store (Flutter, Supabase).

- Designed a Supabase (PostgreSQL) schema of ~16 tables and 6 views supporting events, availability scheduling, friend networks, group chat, and messaging for ~30 beta testers.
- Wrote 7 PostgreSQL functions powering event search, profile search, and interest-based event recommendations.
- Built 8 TypeScript/Deno edge functions that trigger in-app and Firebase push notifications for messages, friend requests, event updates, and group activity.
- Co-developed a ~20,000-line Flutter/Dart client with one co-founder, tracing data flows between front end and backend to fix sync and performance issues.

LANGUAGES & INTERESTS

- **Languages:** English (fluent), Russian (strong comprehension, conversational speaking)
- **Interests:** data architecture, strength training, physics and space
